SUMMARY

Software Engineer skilled in React, Next.js, TypeScript, Node.js, Express.js, and Golang, designing and implementing scalable APIs (REST, GraphQL, real-time) and efficient SQL/NoSQL architectures for high-performance applications.

SKILLS

Programming Languages	Golang, JavaScript, TypeScript
Frontend	React.js, Next.js, Redux, Tailwind CSS, MUI, Shadcn
Backend/Database	Node.js, Express.js, PostgreSQL, MongoDB
Tools	Git, Postman, Jira
Soft Skills	Team Management, Communication, Decision Making

EXPERIENCE

Jupitice Justice Technologies Private Limited, Technology Park, Chandigarh Sept 2025 – Present
Software Engineer

- Developing a scalable **Express.js REST API** to manage **case data** with efficient CRUD operations.
- Built a modern, SEO-friendly **company website** with **Next.js**, showcasing products and services.
- Resolved key **UI/UX issues** in existing applications, improving responsiveness and experience across devices.

XenonStack Private Limited, Mohali, Punjab Jan 2023 – Jul 2025
Software Engineer

- Built frontend with **React.js/Next.js**, integrating **REST/GraphQL APIs** and **WebSockets/SSE**.
- Developed backend services with **Golang (microservices)** and **Node.js/Express.js (monorepo)**.
- Collaborated to deliver **scalable applications**, enhancing frontend-backend interaction and database efficiency.

Associate Software Engineer

- Developed modular, reusable **React.js** components, integrating with APIs to improve functionality.
- Built backend routes and middleware, efficiently managing data persistence using **PostgreSQL** and **Golang**.
- Resolved issues and improved frontend-backend communication, boosting performance and reliability.

PROJECTS

AI-Based Platforms (Internal)

Tech Stack: Next.js App Router, Shadcn, REST APIs, WebSocket, Event Streams, Zustand, recharts

- Built AI-powered web platforms with real-time features and seamless user experiences.
- Connected frontend with AI backends via REST APIs, WebSockets, and server-sent events for live interactions.
- Accessible, responsive UIs with smooth navigation using Next.js and Shadcn, ensuring optimal user experience.

WhatsApp Campaign Automation Platform — Full-Stack Developer

Tech Stack: **Express.js**, DynamoDB, GraphQL, React.js, Redux Toolkit, MUI, Ant Design, AWS-Amplify, Zod

- Developed and maintained end-to-end features for automating personalized WhatsApp campaigns.
- Implemented backend routes using **Express.js** and managed data flow through **GraphQL APIs**.
- Secured the platform with role-based access control and integrated authentication with AWS Amplify.

Logistics Management Platform — Full-Stack Developer

Tech Stack: **Golang**, **PostgreSQL**, **Next.js**, MUI, Redux, Styled-Components, React-Intl, REST APIs

- Logistics management system to manage deliveries, pickups, and fleet tracking across multiple organizations.
- Built frontend dashboards and operational tools using **Next.js**, supporting multi-role and multilingual access.
- Optimized API calls with debouncing and pagination to reduce server load and improve responsiveness.

CERTIFICATION & ACTIVITIES

- AWS Certified Developer - Associate [View Certificate](#)
- The Complete JavaScript Course on Udemy – [View Certificate](#)
